DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4, 6-10 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Bernd (DE382381).

Bernd teaches a water heater (Fig. 1-4) for use wish a wash basin comprising a tube comprising of a plurality of conductive tube coils 16engaging or being close to an adjacent coil, an electric heater 50 extending along the substantial length of the tube in good heat conductive relation with the tube, the heater being positioned exterior to the tube 16 such that deposits do not form on the heater 50 (Abstract), and inherently capable of supplying the water volume of approximately 14 ounces of water because Bernd discloses the wash basin invention.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/664,699

Art Unit: 3742

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bernd view of Leuschmer et al (3,711,681).

Page 3

Bernd teaches substantially the claimed invention, but does not teach that the heating element is brazed. Leuschmer discloses a heater 4 joined with tube 4 by brazing 5. It would have been obvious to one having ordinary skill in the art to modify Bernd's invention to join a tube and a heater by brazing in order to secure the joint as taught by Leuschmer (col. 1, lines 40-45).

5. Claims 11-13 and 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Bernd in view of Alston et al and further in view Winter et al.

Bernd teaches substantially the claimed invention, but is silent abot tube diameter and temperature range.

Alston teaches a portable water heater including a tube with 1 and 1/2 inch diameter.

Winter disclose a water heater operating in a temperature range from 68 to 100 degree

F.

It would have been obvious to one having ordinary skill in the art to modify Bernd's invention to adopt a tube with ¾ inch diameter as taught by Alston and a length of a tube about 74 inches as conventional design change, and a temperature range from 68 to 100 degree F in order to preclude any hot outer surfaces as taught by Winter (col. 1, lines 37-42).

Art Unit: 3742

Response to Arguments

6. Applicant's arguments with respect to claims 1-2 and 4-16 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leonid M Fastovsky whose telephone number is 571-272-4778. The examiner can normally be reached on M-Th. 8.00 am -6.00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
